

Daimús, May 2016

Dear Sir / Madam:

I have been working with Linux for six years, when I migrated my own company from a Microsoft platform to a Linux based one. After that I was forced to play the role of the system administrator: the new environment required configuration, new software, updates, user accounts to be defined, network issues to be solved, office equipment to be installed and configured, backups to be made and restored when needed.

In 2015 I decided up to unify all the experience that I acquired during these years, passing the LFCSA exam of the Linux Foundation, which certifies my skills as a system administrator.

Although I lack the experience of working in a major company, I am a fast learner and self-taught, and I am eager to working in a dynamic environment, where I can use my experience along with my language skills, especially English, to offer yours customers a high quality experience.

I have attached my resume for your review. I would appreciate the opportunity to speak with you to discuss my interests and qualifications in more detail

Sincerely,

Silviu Daniel Alexandru

PERSONAL DATA

Name: Silviu Daniel Alexandru

Birth: 02/01/1979

Place: Galati, Romania

Nationality: Romanian

Current address: C/ Roger de Lauria 71,

La Veranda I, 5-16, 46710, Daimús

PROFESSIONAL EXPERIENCE

2016 - Present

Business Intelligence Consultant

AuraPortal

As part of a the team, I am analyzing the internal processes the client wants to automate, as well as developing the processes using the AuraPortal possibilities, configuring , testing and deploying them into the client's installation. I also provide remote assistance and configuration for the client's processes.

2016 - Present

Administrator and writer for the website www.thatlinuxsite.com

Deploying, configuration and maintenance of the web server using Amazon Web Services (AWS) and Wordpress. Writing and publishing articles about how to get started with Linux.

2010 - 2015

System Administrator

Neobroker Broker de Asigurare

In my own company, Neobroker Broker de Asigurare S.R.L., I was fulfilling the tasks that normally an IT department would have done:

- successfully migrating from a Microsoft platform to an open source one based on Linux, by installing, configuring and maintaining Debian GNU/Linux and LibreOffice on three workstations
- creating and managing user accounts
- creating backups
- installing software packages
- configuring and managing network equipment (modems, routers), printers and scanners
- configuring the company's email accounts using Google Apps

2005 - 2015

CEO

Neobroker Broker de Asigurare

Owner and CEO of an insurance broker company, Neobroker Broker de Asigurare S.R.L., with the main tasks of customers management and planning an efficient workflow for the sales team
